

Zero-Ohm Systems Now Distributed by Trius Vertrieb GmbH in Germany

Montreal, Canada, April 27th, 2020

Neu im Vertrieb - Zero Ohm Systems
Die Alternative für jede 100/70V Installation

- bis zu 40 niederohmige Lautsprecher parallel betreiben
- voller Frequenzgang von 20Hz bis 20kHz
- mehr Leistung durch herkömmliche Endstufen
- Kurzschluss Kompensation

Transforming the Laws of
Sound with our partner TRIUS
Vertrieb GmbH & Co. KG

TRIUS

We are pleased to unveil our new exclusive distributor in Germany. Trius Vertrieb GmbH has been serving this important market for over 25 years; it represents top professional AV manufacturers from around the world. Our new partner has the reach, vision and knowledge to spread the message about our unique patented solutions.

Trius Vertrieb further extends our well-established European coverage into the economic hub of the continent. With a long track record of success, and a passionate AV staff, Trius Vertrieb will educate the market about the unique possibilities provided by our revolutionary solutions that challenge the status quo. Audio professionals in the nation no longer need to sacrifice sound quality on major installations. Zero-Ohm Systems provide the simplicity of 70V/100V solutions while simultaneously delivering all the preferred benefits of Low-Z. Our plug-n-play design essentially eliminates the need for transformers while offering the core customer benefit of full-range sound. The B2B installer is rewarded with simplified job execution and effortless scalability which leads directly to impressive time, cost and labour-saving advantages on a large variety of jobs. We look forward to making great new strides with the latest impressive member of our growing team.

About ZOHMS Inc.

Zero-Ohm Systems is a global manufacturer of a unique award-winning patented technology. Best of Show Distinction at ISE 2020; Best New Product Technology (Innovations Showcase) InfoComm 2017.

Our passive devices interconnect between any amplifier and loudspeakers without worrying about speaker loads, impedance and long cables runs. Forget the limits of traditional systems. You can now connect 20-40 speakers (or more) in parallel to one amplifier without the use of transformers. Until now, the ability to connect multiple speakers in parallel was confronted by the issue of operating the amplifier at a safe impedance. Although there are amplifiers that operate at 4 ohms and 2 ohms safely, any effort to drive them below the rated resistance load led to device failure. With this revolutionary invention, the rules have changed! Zohms products are ideal for major installations like hotels, shopping malls, theme parks, stadiums, bars, cinemas, reception halls, cruise ships, restaurants, airports, and more. If you would like more information or if you are interested in representing Zero-Ohm in your territory, visit www.zohms.com and/or send an email to info@zohms.com.
